GraphQL / RESTful API

Unit Testing / Jest

Heroku / Vercel / GFirebase

GitHub / Git

ABOUT ME

I have always been very passionate about new software, UIs, and automations. Enjoying the computer science courses I have taken in my studies and keeping it as an enthusiastic hobby ever since. After years of honing my skills with projects on my portfolio, I am trying for an exciting opportunity to make industry standard applications on a software development team!

PROJECTS

- **Great Quotes** is a ReactJS App that allows visitors to add quotes and comments seamlessly. I have many quotes that I admire and decided it was time to make an app where people can share their favourites. Created with React Redux, Toolkit, Custom Hooks, and Router. Deployed application using Vercel. [[Project](#)]
- **Node Bookstore** is a multi-paged online store website created with the primary focus on learning backend code of Node.js and ExpressJS. Containing features such as authentication, password resets, payment services and security. Deployed with Heroku [[Project](#)]
- **Teris**, made as a WPF application using C# and .NET. A game I really enjoy playing, so why not code it! App lets you hold blocks and increases in difficulty as game score increases. [[GitHub](#)]
- **Reacts Meetups** is a Next.js framework app where visitors can create meetup events by uploading images and descriptions. Created with a tutorial but I adapted it to use a MongoDB database. [[Project](#)]

RELEVANT EXPERIENCE

September 2020 – Present | SmartTech Deals, Calgary, AB

Shop Assistant / Web Developer

- SmartTech is a local Calgary business that repairs and resells laptops, phones, and tablets at discounted prices. Their website has hundreds of visitors daily and dozens of sales per week.
- Performed web development, design, and maintenance of the online store on Shopify platform. [[website](#)]
- Accelerated business growth by using, SEO, keyword research, Google analytics, Google search console, social media, and digital marketing to increase website traffic.
- Performed RAM, Screens, Bluetooth, and other hardware upgrades for laptops.
- For a period of 3-4 months, I had to solely manage the store dealing with customer support and sales while managing the website. Faced certain adverse situations with customers which required strong communication skills.

OTHER EXPERIENCE

September 2018 – January 2019 | Amazon Fulfilment Centre, Calgary, AB

Worker

- Worked at the warehouse centre storing incoming products. Learned warehouse safety, pallet work and to use RF Scanners. Also helped management with extra tasks and overtime if needed.

November 2023 – Current | Calgary Food Bank, Calgary, AB

Volunteer

- Currently helping at the Food Bank warehouse in creating and storing food hampers.

October 2017 – February 2018 | TELUS Spark Science Centre, Calgary, AB

Volunteer

- Acted as a tour guide for the centre, also aided in public events and demonstrations.
